## INDEX

**INSTRUCTIONS.**—The list of Machinery Manufacturers follows this index. It is arranged alphabetically by States, Cities, Towns, etc. The list is numbered consecutively from 2 up.

This index is an alphabetically arranged list of names and kinds of machines and machinery. Look for the main or leading name of the machine wanted. After the main name of any machine the specific kinds of that machine are printed in parentheses. The numbers refer to the names correspondingly numbered in the list of manufacturers, easily ascertained by following the running heads on the pages.

**EXAMPLE.**—If Match Box Machines are wanted, look in this index for BOX; then look through the subheadings in parentheses for (Match). The number 1394 will be found. Turn to name number 1394 in the following list of manufacturers. In cases where the same machine is known by more than one name, look in the index under the various different classifications under which it might be included.
